MOST THINGS POSTPAID

You will see that most everything in this catalog is delivered to you Postpaid. This represents a saving for you. Some things too large to go by parcel post are quoted "Not Prepaid." We ship these by Express (low second class Express rate . . . generally as cheap as freight). If your order contains some of the larger items which must go by Express and some which we would normally prepay, we send the entire shipment by Express so you will receive everything together. Because of a minimum rate plan, these additional items do not usually increase your Express bill, but go without additional charge.

However, for this privilege we will include some additional nursery stock, of greater value than the postage we would normally prepay.

Dear Friends:

As usual, I have reserved this space for a letter to you. Since I cannot see every one of my friends in person, or cannot write each one a letter individually, I like to think this letter fills that job. I hope you, too, can imagine that this is "your" letter.

First, I must thank you, on behalf of myself and our whole seedhouse "family", for your business during the past year. We do appreciate every order you send us, and we pledge ourselves to continue to deserve your confidence by always offering you the finest possible merchandise at fairest possible prices.

Again, let me remind you to order early. This is your "insurance" that you'll get exactly what you want, when you want it. We try to come out even on everything, but every year we run out of some items, despite our best efforts. We don't want to disappoint anyone, but those who order late in the season must run the risk of asking for something we've run out of. Then, too, we offer special premiums for early orders. Nursery premiums are listed on page 19 . . . Garden Seed on page 27. Sorry, we can't offer these premiums on Farm Seed or Hybrid Corn; expect them on Nursery and Garden Seed orders only, please.

You'll notice, throughout the nursery pages, little lines that read, "Plant Spring or Fall." Our Fall Catalog just isn't big enough to list everything you can plant in the Autumn, so please save this catalog and order those items we've marked for Fall planting.

Again, thanks for your nice orders. Let us hear from you often, and have a most happy and prosperous 1953.

The Story of TRIPLE TESTING

We want to know . . . to be sure . . . that every packet of seed we send our friends is the best we can find. We want to be certain that all seed is high in germination, suited to our country, and (in the case of vegetables) good eating.

So first, every lot of vegetable seed is **Laboratory Tested**. In our modern, up-to-date labs, skilled workers determine scientifically the germination of the seed; make certain that every packet, every bag is ready and "anxious" to grow. Literally thousands of these tests are made each year. That's one big reason why our customers report such good stands and such high yields from their gardens.

Second, we plant scores of varieties of vegetables in our 76-acre test gardens every year . . . old favorites and new ones, too. In these tests we search out the thriffter, heavier yielding varieties. Time and again we discover a superior plant growing in an already established strain. From this superior plant our improved strains are developed. The name of the variety is the same, but it is the better, the improved strain we packet for our customers.

Finally, we taste-test the vegetables. Our seed-house folks try out the various strains in their kitchens, then report back. This test is important, too, because from their reports we learn exactly which varieties are finest-textured, best-flavored. There's the story. To my knowledge, no other seed house goes to such extremes to be absolutely certain that their customers receive the finest quality, best-tasting vegetables. See for yourself, this year, what **TRIPLE-TESTING** means to you.

Edward May

P. S. Perhaps the most important new development I have to report is our new **GERMAYTRETTED** process. After testing and discarding many, many formulae, we finally found the exact combination of chemicals to really substantially increase stand and yield from vegetable seeds. In our Test Gardens we carefully checked **GERMAYTRETTED** plantings against untreated seed, and were amazed at the difference in many vegetables. We have marked these vegetables on the following pages. Look for the **GERMAYTRETTED** symbol: another example of continuing research to bring you better things for home and garden.

105. (50 days) All-America winner in 1949 and an outstanding star in our Test Gardens again last year! The plants make a vigorous growth and set an unbelievable big crop. The pods are long and round, meaty and really stringless. *Can't be beat for flavor and tenderness.* The big yield comes on during a short period, so you make a few big pickings instead of numerous small ones. The seeds inside the pod of Top Crop develop slowly, making an extra thick and meaty pod. They are still tender and stringless after others would be tough and useless. No matter what other green beans you have in your garden, be sure you plant TOP CROP this year. It's a winner. **Big 3-Oz. Pkt. 15c; 1/2 lb. 38c; 1 lb. 65c; 2 lbs. \$1.15, Postpaid.**

NEW EVERBEARING BURPEE HYBRID

Yields Heavily When Others Fail. Keeps Producing Until Frost.

354. (60 days.) Anytime after the vine growth was well started in late June until frost came you could stand off 100 yards from our Test Plantings and tell which was the hybrid. **The growth was that much more vigorous. Nice green color, smooth, 7 to 8 inches long and 2 to $2\frac{1}{2}$ inches through (See color picture on Page 29). The seeds are smaller and there are a lot less of them. Customers simply can't believe their own eyes when they see what this hybrid does. They grow better cukes and more cukes in a lot less space and on a lot fewer vines. SWEET CORN IN OUR TEST GARDENS

This year we Triple-Tested 58 varieties of Sweet Corn . . . in our laboratory, in our 76-acre Test Gardens, on our tables. On these pages you see the results of those tests: in our opinion, these are the finest Sweet Corn varieties available today.

WHITE HYBRIDS

151. HYBRID STOWELL'S EVERGREEN. Even before its vast improvement as a hybrid, Stowell's Evergreen was always a great favorite. A great yielder, wonderful flavor and tenderness. *Our Hybrid Stowell's intensifies these fine traits. Sweeter, more tender and the highest yielding of all the sweet corns.* The giant ears are 8 to 10 inches long, snowy white and very, very deep grained. A fine corn.

Big 3-oz. Pkt. 15c; ½ lb. 38c; lb. 65c; 2 lbs. \$1.00, Postpaid.

150. HYBRID COUNTRY GENTLEMAN. Open pollinated Country Gentleman was always a sweet, tender, and deep grained sweet corn. *The hybrid variety improves that fine flavor, nearly doubles the yield and brings a hybrid vigor highly resistant to corn diseases.* The 8 to 10 inch ears are snow white and packed tightly with tender, delicious kernels. You don't know how good Country Gentleman can be until you've eaten this new, vastly improved hybrid.

Big 3-oz. Pkt. 20c; ½ lb. 40c; lb. 65c; 2 lbs. \$1.15, Postpaid

OPEN POLLINATED SWEET CORNS

144. GOLDEN BANTAM. (77 days.) Everybody likes Golden Bantam. Many people won't plant anything else. The flavor is delicious, sugar content high. Kernels are tender. Very wide and deep, cob small.

In a 3-year test, it popped 35% greater volume. Giant popped kernels, the nearest hull-less of any corn you've ever eaten, and the flavor and texture are "excellent". Average a little better than 2 big ears per stalk. Out of 24 varieties in our tests, this was the best. Big Stalks, almost like field corn. **41 ONIONS
 TO THE BUSHEL!**

We thought a bushel of 51 onions weighing 50 lbs. was a good record . . . until a customer at Coburg, Iowa reported 41 of her onions filled a bushel basket. Both records came from our Yellow Sweet Spanish Plants and thousands of our customers make sensational yields every year. Order yours early. They must be planted early to make the big size.

Easy to plant. Easy to grow. And they make tremendous yields of big, mild, sweet onions.

Once you've seen and eaten fine big onions grown from plants, you'll always plant them. Light frosts and freezes, even a light snow, won't hurt them. So, you can put them out extra early to get a full growing season. Plant them about 1½ inches apart. The first time you thin them out for "green" onions. The next thinning for stewed onions. Then, let the rest go on to make you plenty for fall and winter use. We have the two best-by-test varieties: **WHITE BERMUDA**, the mildest you've ever eaten, and **YELLOW SWEET SPANISH**, a wonderfully mild onion that keeps for months! Both must be planted early if you want the most and best for your money. So, order early. We'll ship at the right time.

**ALL ONION SEED NOW

MAY-WAY CUSTOMERS SPEAK

HERE ARE REPORTS FROM FOLKS WHO PURCHASED MAY-WAY CHICKS — AND LIKED WHAT THEY GOT! OUR FILES ARE FILLED WITH LETTERS LIKE THESE. THEY CAN TELL YOU, BETTER THAN WE, WHY THOUSANDS OF MIDWESTERN FLOCK-OWNERS DEPEND, YEAR AFTER YEAR, ON MAY-WAY CHICKS FOR PROFITABLE POULTRY OPERATIONS.

Celfax, Iowa

"I have ordered May-Way White Rocks 8 years and like them better all the time. They are good layers and sell good when you have to cull some. The Produce Man and culler always brag on my chicks and say, 'Where did you get them?'"

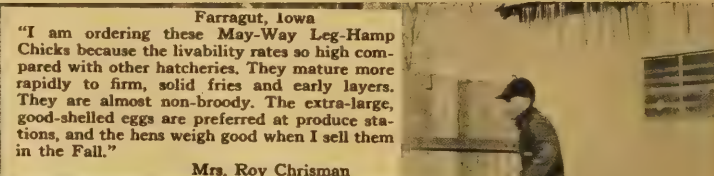

Mrs. D. H. Hobbs

Farragut, Iowa

"I am ordering these May-Way Leg-Hamp Chicks because the livability rates so high compared with other hatcheries. They mature more rapidly to firm, solid fries and early layers. They are almost non-broody. The extra-large, good-shelled eggs are preferred at produce stations, and the hens weigh good when I sell them in the Fall."

Mrs. Roy Chrisman

Swanton, Nebraska

"In the past years I bought chickens from eleven different hatcheries. I found that in White Leghorns yours were the largest, heaviest layers, and healthiest of them all. That is why I came back and ordered 1400 Best Grade again this year."

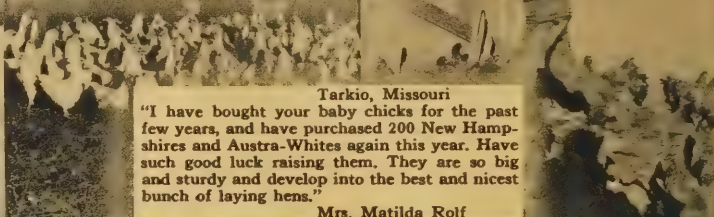

Mrs. Lad Placek

Tarkio, Missouri

"I have bought your baby chicks for the past few years, and have purchased 200 New Hampshire and Austra-Whites again this year. Have such good luck raising them. They are so big and sturdy and develop into the best and nicest bunch of laying hens."

Mrs. Matilda Rolf

Fontanelle, Iowa

"September, 1951, I housed 250 May-Way Best Grade Leghorn pullets. Death loss: 3 pullets. Production averaged 70%, and I do not have modern equipment, either. May-Way chicks have always made me money, because of their high livability and high laying ability."

Mrs. Pearl V. Jones

Westboro, Missouri

"We bought May-Way New Hampshire Reds again because out of the 150 we bought last May we only lost 5. We put 60 pullets into the laying house and got our first eggs in October. From November through March our daily egg average is 42 plus and such large eggs! Hen weight average is 9 pounds. The chicks we got from you this year will be 4 weeks old Monday. We got 163 and have not lost a one!"

Mrs. Charles Parmenter

Council Bluffs, Iowa

"I am ordering May-Way Austra-Whites because your straight run chicks were 65% pullets and laid at 4½ months. They laid well all Fall and 80 to 85% all Winter and Spring. A chicken doctor culled them for us the next Winter. He culled out twelve from 250 hens."

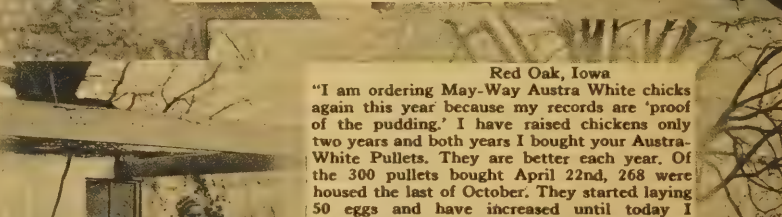

Mrs. Jack Oltmans

Graham, Missouri

"I raise May-Way Production Red chicks because they don't have to be coaxed to live and grow. After they are grown I have a plump-breasted bird that will really keep the egg cases filled. They do not moult easily and are not broody and require just ordinary care."

Russell Lemar

Brayton, Iowa

"I have tried May-Way Brown Leghorns for the last three years and have had wonderful results with them. I do know they take less feed and less space in the laying house after they are matured than the larger breeds of chickens, and I also think they lay more eggs."

George Cerka

Manning, Iowa

"I beat that narrow margin between high and low egg prices! By buying high-producing, low-cost May-Way chicks I will make use of every penny to them. I also think Austra-Whites are eggs without sacrificing."

Axel Nielson

Red Oak, Iowa

"I am ordering May-Way Austra White chicks again this year because my records are 'proof of the pudding.' I have raised chickens only two years and both years I bought your Austra-White Pullets. They are better each year. Of the 300 pullets bought April 22nd, 268 were housed the last of October. They started laying 50 eggs and have increased until today I gathered 209 eggs. This makes 80% production, since I've lost only 8 hens."

Mrs. Robert V. Gillespie

Bureau of Agricultural Economics predicts poultry will show biggest gain in net income in 1953. A poll of agriculture economists recently brought estimates of up to 25% higher egg prices. Experts are unanimous in their predictions of higher and stronger egg prices for 1953! A May-Way laying flock can raise your income this year!

MAYGOLD 69

This member of the Maygold family has already demonstrated rugged productive ability. Entered as Experimental 200 in the North Central Section of the Iowa State Yield Tests, it won first place in 1946. It is a high yielding hybrid, with good stiff stalks and medium dent kernels. Maturing a little later than 89 and 99A, Maygold 69 is well adapted to North Central Iowa and is very fine in all areas south of that section where an early corn is desired.

MAYGOLD 99A

Every year this early maturing hybrid brings a surprise in big yield and easy feeding quality to farmers all over the corn belt. You get a vigorous early start and rapid growth. You get a big yield and good feeding quality which challenges even the later season hybrids. Maygold 99A has established a great reputation for all-around superiority wherever an early maturing hybrid is wanted.

MAYGOLD 47

This new member of the Maygold Family brings you a Main Crop Hybrid with improvement. Greater yield. Stiffer, stouter stalks. Less ear dropage. All the fighting resistance to insects, diseases, and bad weather . . . plus wonderful improvements to insure a great crop. Bloodline-Bred to set new production records on your farm.

MAYGOLD 59

A long-eared crib-filler with unexcelled fine feeding quality. Maygold 59 is a single-ear hybrid of the Reid-Krug type. An early starter with vigorous growth and resistance to unfavorable conditions. You will like the uniform height and easy picking as well as the tremendous yield. It is hard to beat Maygold 59 for all-around performance.

MAYGOLD 67

Newest member of the Bloodline-Bred family of Maygold Hybrids. 110 to 115 day maturity. Beautiful ears are longer and have more girth than most hybrids of like maturity. A fast grower with lots of hybrid hustle and resistance. Shells a high percentage of good feeding corn. Stands up stiff and strong for smooth, clean picking. You'll be proud of your field of Maygold 67 and of the profit it puts in your crib.

**NOW! The Biggest
Lawn Grass News In Years . . .**

**EVERY POUND OF EARL MAY
LAWN GRASS SEED IS**

GERMAYTREATED

This sensational news means better, thicker lawns for you! We have experimented . . . tried and discarded . . . tested and retested until we found this new secret formula: **GERMAYTREATED**.

See the photographs below:

The same seed was used in both tests. Same number of seeds; same soil; same conditions. But look at how much thicker and heavier the stand of grass is where the seed was **GERMAYTREATED**! Fungus, bacteria, diseases, rot and insects killed a great deal of the unprotected seed.

It just didn't have a chance to come up. **GERMAYTREATED** protects all Earl May Grass Seed against these hazards. You'll see the difference in your young lawn: A heavier, thicker stand of "Green Velvet" lawn. And you'll still see the wonderful effect of **GERMAYTREATED** throughout the season: A heavier, healthier lawn with greater resistance to dandelions, plantain, water grass and the other weeds which tend to infest thinner stands of weaker grass.

GERMAYTREATED lawn seed will help you be sure your lawn will get off to a healthy, vigorous start.

**NOW
You Can
KILL OUT
that
CRABGRASS**

WEEDONE CRABGRASS KILLER is non-poisonous to humans and animals. One application will kill crabgrass and mouse-ear chickweed, under proper conditions, without killing clover, bluegrass, fescue or other deep-rooted perennial grasses. It is easy to use, harmless to soil, clean and odorless, economical, and will not kill nearby shrubbery unless sprayed on it *directly*. Complete instructions on can. 6½ oz. size, \$1 (enough to treat 500 sq. ft. of mature crabgrass or 1,000 sq. ft. of seedling). 26 oz. can, \$3.00, Postpaid.

Thrifty "PLUM ORCHARD" Collection

The Plum is our hardiest, most dependable fruit. But remember, plums like company of their own kind. They need company, too, because it is cross pollination that makes great yields. Every twig becomes loaded, the branches bend with the weight. That's the result of planting several varieties, including a good pollinizer. We have selected 4 of the finest and one of them (Toka) is the extra pollinizer you need. Plant them and have lots of luscious, juicy fruit.

The tree is an ornamental beauty when in bloom and the fruit is easy to pick. Dwarf apple trees bear 2 to

TOP CROP

105. (50 days.) All-America winner in 1949 and an outstanding star in our Test Gardens this year! The plants make a vigorous growth and set an unbelievably big crop. The pods are long and round, meaty and really stringless. Can't be beat for flavor and tenderness. The big yield comes on during a short period, so you make a few big pickings instead of numerous small ones. The seeds inside the pod of **TOP CROP** develop slowly, making an extra thick and meaty pod. They are still tender and stringless after others would be tough and useless. No matter what other green beans you have in your garden, be sure you plant **TOP CROP** this year. It's a winner. **Big 3-oz. Pkt. 15c; 1/2 lb. 38c; lb. 65c; 2 lbs. \$1.15, Postpaid.**
